OUR MISSION

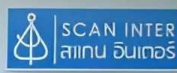

With the mission of “Empowering transformation towards a carbon-free era”, AIKO keep on pursuing extreme innovation and cutting-edge technology. We are committed to Building partnerships for customer value and your business.

AIKO ENERGY SIII PLATFORM

With the integration of multiple energy devices, such as photovoltaic power generation, energy storage batteries, and charging stations, the energy management system for commercial and industrial uses can efficiently manage energy, monitor power consumption in real-time, analyze energy consumption of equipment, and predict energy consumption in future scenarios. This increases the proportion of green electricity consumption, ensuring that owners consume electricity economically, safely, and efficiently.

WHY CHOOSE AIKO?

In partnership with national financial leasing enterprises and investment funds, AIKO offers a comprehensive suite of solar power solutions, including solar panels for commercial buildings and industrial facilities, as well as scalable energy storage and management systems. AIKO is committed to delivering industry-renowned, customized project services that empower C&I property owners to maximize value, minimize risks in all weather conditions, alleviate financial burdens during peak usage hours, and generate additional revenue streams. With established project cases in Spain, Germany, the Netherlands, Japan, and China, AIKO unwaveringly contributes to global carbon emission reduction and neutrality goals.
